

The background is a dark, monochromatic image of graduates in caps and gowns. A large, semi-transparent circular graphic is centered on the page, with a dotted line forming its perimeter. In the top right corner, there are four horizontal rows of small white dots. In the bottom left corner, there are two vertical lines of small white dots. The text is centered in the middle of the image.

Uniquely Abled Academy

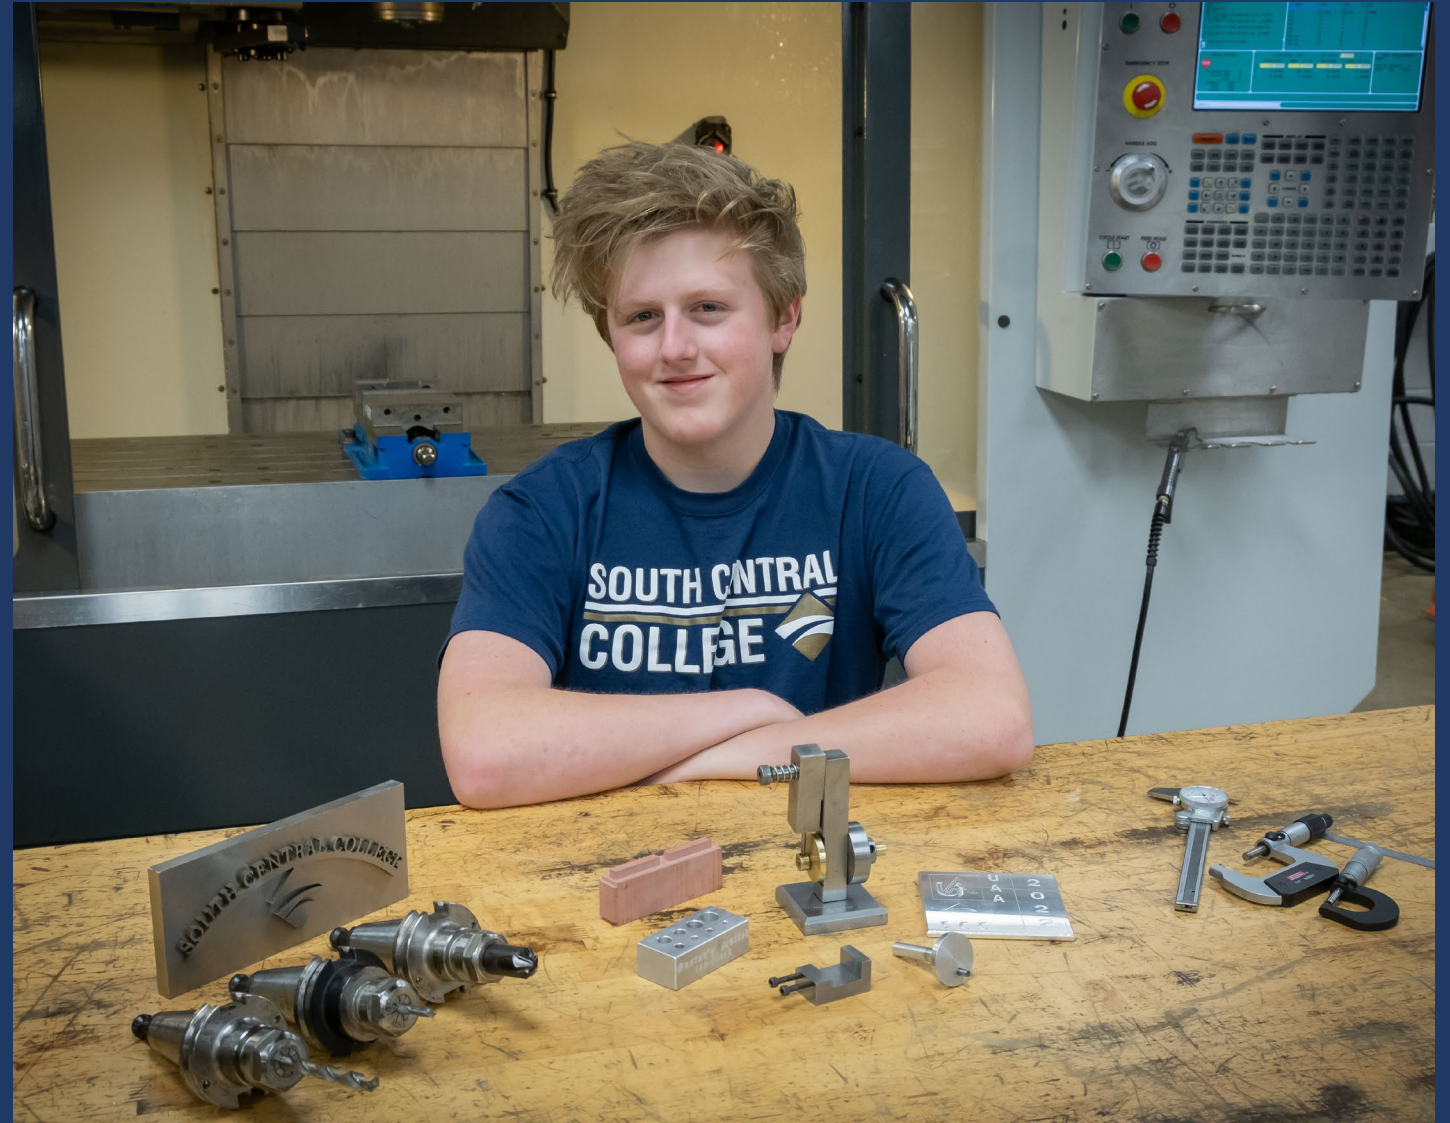

June 6, 2022 to August 25, 2022

Watching the air motor
turn on, only to stop on its
own was annoying, at
first, but taking it apart,
finding and fixing the
problem was super fun.

-Gus

I really enjoyed working on all the different machines and making all the motor parts from different material. I really liked working with Bill and Jon because they helped me understand the machines better.

-Tristan

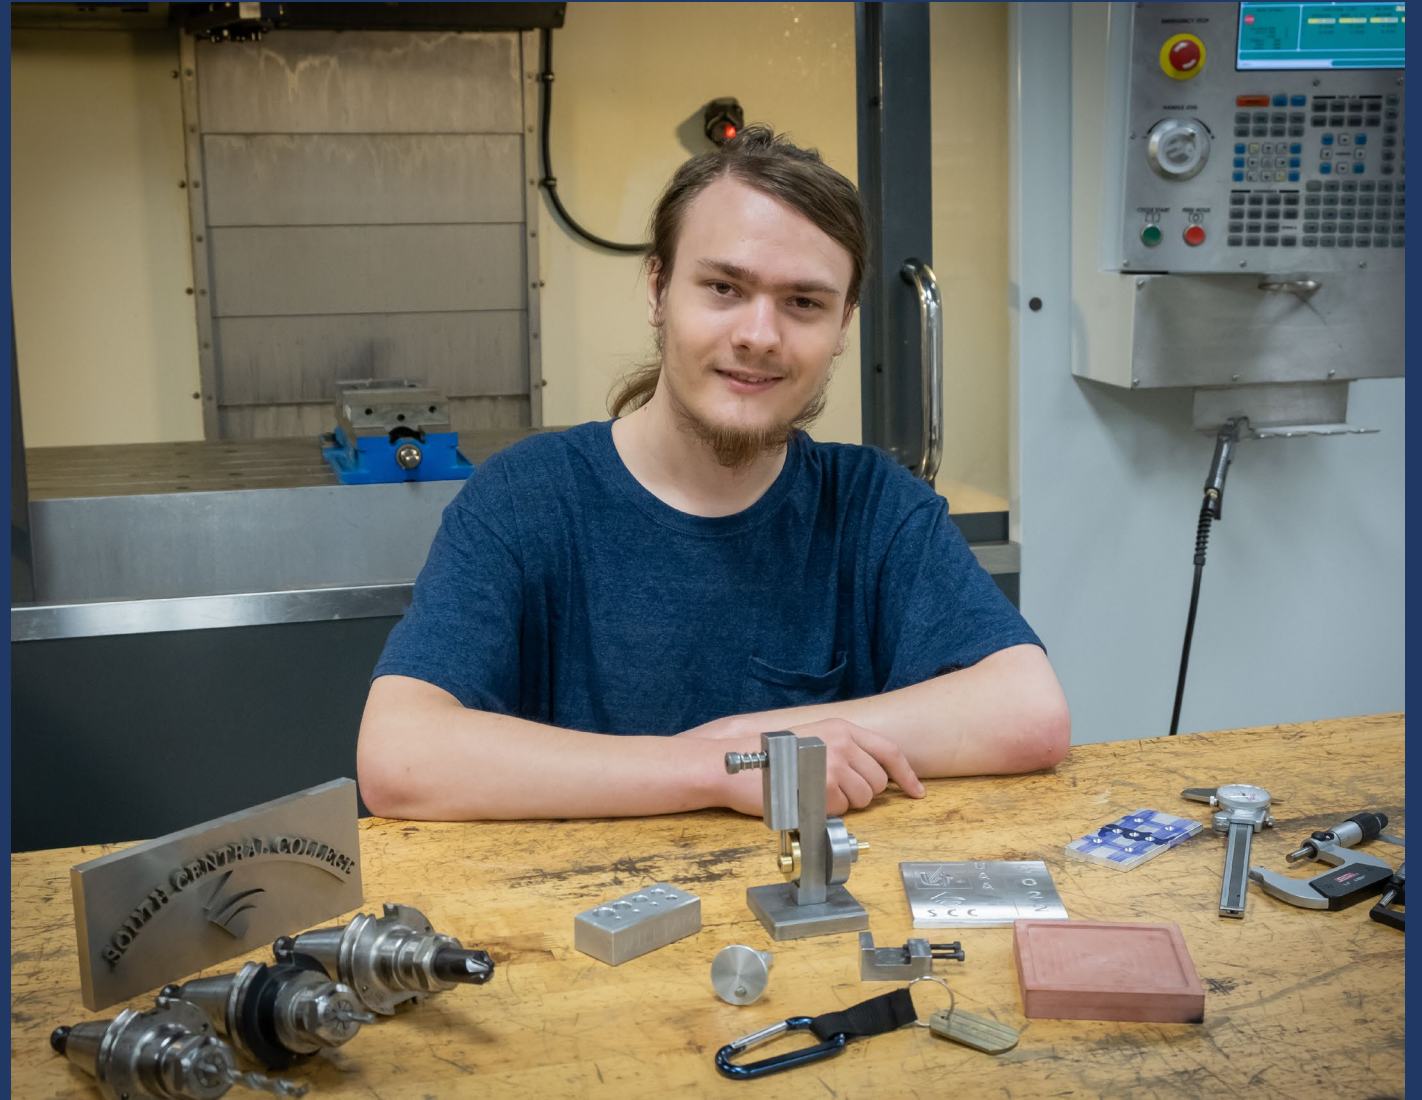

When we first tested our air motors, we discovered we were using the wrong material for one of the parts. This shows that everyone, even the pros can make mistakes. I've also made some mistakes while I was here. The best we can do is learn from them. Even after all the problems we faced, it was worth it to see it all come together.

-Ben

When I think of this class, I think of the mistakes I've learned from. While using the manual mill, I eventually learned to set the machine in low gear when loading and unloading tools, and make sure it's set back in high gear by turning the spindle. The true highlight of this summer was meeting my soulmate, Anisa Stanton-Dahhane.

-William

After I got done with school, my mom found this opportunity and it sounded interesting, so I decided to try it out. Every day we work hard in the shop and we got to play games as a class. We built the whole air motor- the piston was my favorite part to make.

-Josh

I liked the mill, lathe,
and using Master
CAM.

-Cory

My most favorite part that I made was the brass keychain proving my love for my fiancé. What I learned the most was that making mistakes is not the end of the world. My teachers were very understanding and very patient when I had given up on myself. My fellow students are the best classmates I could ever have.

-Kyle "Big K"

The program has given me the basic knowledge about CNC machines and G code. Seeing everything we learned come together after 12 weeks has been awesome.

-Dan
